Brass Ball Valve

Part # - 02224-A

Restrict or Seal Vacuum Lines

This is a simple measure to control vacuum pressure on your vacuum bag, whether you're looking to restrict air flow or seal it off completely.

#2224-A is an industrial-style Brass Ball Valve that will stand up to harsh working environments. The valve can be installed in-line with barb fittings, or can be attached to a T-Attachment (#898-A) or Bleedoff Valve Assembly (#902-A) right at the pump. Purchase Male to Male Brass Fittings (#2226-A) for easy use with other assemblies.

Information present herein has been compiled from sources considered to be dependable and is accurate and reliable to the best of our knowledge and belief but is not guaranteed to be so. Nothing herein is to be construed as recommending any practice or any product violation of any patent or in violation of any law or regulation. It is the user's responsibility to determine for himself the suitability of any material for a specific purpose and to adopt such safety precautions as may be necessary. We make no warranty as to the results to be obtained in using any material and, since conditions of use are not under our control, we must necessarily disclaim all liability with respect to the use of any material supplied by us.
