

## 1926-A The MultiPro Dremel Rotary Tool

**Overview:**

The MultiPro Dremel tool will perform on demand without the need of recharging batteries. This tool sports a “click & set” on and off switch which controls the speed within a range from 5,000 to 35,000 rpm. The Universal Motor utilizes ball bearings to keep the motor cool under load and uses replaceable motor brushes to extend the motor life up to 5 times longer. This tool is supplied with 1/8” collet, 10 assorted accessories, wrench and Quick Start Guide.
