

118 Meguiar's Mold Polish Conditioner and Release Wax

Overview: Meguiar's Mirror Glaze products comprise a complete production mold system based upon proper mold preparation and a paste wax. The advantages of this system are many; it yields parts with a very high gloss, involves no time consuming sprays and, with proper care, provides trouble-free releases. This system is compatible with PVA for added release insurance.

Available in 11 oz container.

Features and Benefits:

- **Costly blend of imported waxes**
- **Specially formulated to provide the maximum number of releases per application**
- **Especially useful on tooling and new molds**

Directions: For best results use soft terry cloth towels for application and wipe off.

For new molds apply three to five coats of # 118 Mold Release Wax, allowing each coat to set up before wipe off. Work an approximate 2' X 2' section at a time, using a circular motion to work #118 into the pores of the gel coat. With a clean towel, break surface film before it completely dries. Follow with a clean towel and buff to a brilliant, hard finish.

Storage: Keep out of Reach of Children. All containers should be properly labeled to prevent accidental ingestion or improper disposal. Individuals should reseal any partly used material back in the container. Store under cool, dry conditions away from open flames and high temperatures. For more detailed instructions on storage, please see the MSDS Sheet.

Safety and Handling: #118 Meguiar's Mold Polish Conditioner and Release Wax contains ingredients that could be harmful if mishandled. Contact with skin and eyes should be avoided and necessary protective equipment and clothing should be worn. Individuals should wash with soap and water before eating, drinking, or using toilet facilities. Individuals should observe conditions of good industrial hygiene and safe working practices. For more detailed instructions on handling please refer to the MSDS Sheet.
