

1148 Vacuum Generator

Overview: A low cost and reliable method of generating a vacuum for those who already have a good air compressor. The generator will create 27" of Hg vacuum/pressure when coupled in-line to an air compressor capable of producing 2.2 CFM. Larger air compressors are advisable for continuous use applications. Smaller air compressors should use the #2229-A Vacuum Generator. Suitable for parts up to 80 sq. ft.

Product Features:

- **Low cost vacuum source**
- **Compact Size**
- **Easy to Mount**
- **No moving parts/zero maintenance**

Product Specifications:

Model #	Description	Suggested Operating Pressure	Air Consumption @ suggested operating pressure
VG-015-00-00	Single Stage High Vacuum Series	30-75 psi	3.5 CFM

Air Flow		Maximum Vac		Air Consumption
CFM @ 0" Hg	M ³ /h @ 1000 mbar	Inches Hg	Mbar	CFM @ suggested Operating Pressure
2.2	3.7	27	99	3.5
