

2228 Industrial .56HP Vacuum Pump

Overview: This industrial single-phase pump is ideal for applications where the discharge must be totally free of oil. This rotary vane vacuum pump requires very low maintenance, has long vane life and low noise levels. It is designed to operate on a continuous basis throughout a pressure range of atmospheric pressure to 25.5" Hg.

.56 HP, 25.5" Hg, 5.6 CFM Rotary Vane Pump comes with unlimited One Year Warranty

Product Features:

- **Equipped with an inlet filter, vacuum regulating valve, discharge silencer, and vibration isolators**
- **Ideal for applications where air is the gas and where the discharge must be totally free of oil**
- **Low maintenance requirements**
- **Long vane life**
- **Low noise levels**

Specific Product Properties:

Flow (SCFM @ 0 In. Hg)	2.8
Horsepower	0.32
Speed (RPM)	3300
Maximum Vacuum (in. Hg)	25.5
Weight (lbs.) - w/motor	15.4
Noise Level (Max. dBA)	56
Intel size (BSP, inches)	1/4
